A hand-drawn graph on a grid. The grid consists of 10 vertical columns and 10 horizontal rows. Two curves are plotted in blue ink. The first curve is a parabola opening upwards, with its vertex at approximately (2, 2). The second curve is a straight line with a positive slope, passing through approximately (2, 8) and (8, 2). The two curves intersect at two points: one at approximately (3, 6) and another at approximately (7, 4).
